

Besam SL500 and Besam SL500 T automatic sliding doors

ASSA ABLOY

ASSA ABLOY Entrance Systems

Superior flexibility

Convenience and energy-savings combined

Upgrade and modernize with ease

Applicable even on existing doors, regardless of brand

The Besam SL500 can be tailored not only to functionality, but also to your budget. Its modular features ensure state-of-the-art versatility and convenient upgrades.

- Flexible opening width
- Adjustable hold-open time
- Auto-airing and sustainable-drive mode options
- Nurse-function for quick and partial opening
- Intelligent lock management
- More efficient and less time-consuming service

Value for money

Standardization often means you pay for functionalities you never asked for, or that products do not meet your specific business demands. We simply believe that **each entrance is unique and that you should get value for your money - at all times.**

Whether you'd like to further improve energy savings or add extra security to your sliding door system – tailored solutions have never been easier or closer at hand. **We can upgrade and modernize to meet new requirements** without time-consuming and complex entrance re-modelling.

Tailored to your budget and needs

We don't believe in you waisting money on abundant functionalities, nor do we want you to lack any. The Besam SL500 can be **tailored not only to functionality and performance, but also to your budget and maintenance needs.**

“Versatility to ensure value for money - at all times”

Convenience and energy-savings combined

Convenience to us is equivalent to comfort - that is making things simple and effortless for our customers. That is why we have paid extra attention to the features that will ensure optimal performance but minimal hassle for you.

During intense traffic situations, the entrance **hold open time will automatically increase**, ensuring uninterrupted flow, for the convenience of pedestrians and staff. This intelligent feature not only saves energy, it also increases the product's lifetime.

With additional sealing (Besam TightSeal), sustainable drive mode, intelligent opening width depending on traffic, inner- and outer door air locking, and timer settings - be assured that your entrance **suits your people flow as well as your environmental footprint.**

SL500

Value for money

Available as 150mm and telescopic solution

Select your program easily depending on traffic

Maintenance programs for your needs and budget

Aesthetically appealing

The Besam SL500 and Besam SL500 T operators are ideally slim and appealing without compromising with opening width or noise level. The program selector is intuitive, discrete and **attractively modern in its design**.

We believe in diversity. For that reason, Besam door systems can be tailored to your wishes. With the modular features and upgrade possibilities of the operator in combination with our vast offer of different frames and glass, you can **rely on creating the ideal and most appealing door system for your business and traffic flow**.

Security

Secure entrances give you control of access and entry around-the-clock, safe-guarding your staff and goods. The Besam SL500's security system and the key impulse include a locking feature so **unwanted visitors cannot follow staff inside when entering a building**. It also has an active lock function in exit mode, so people can exit the building while preventing entry after closing time.

Safety

We, like you, take personal safety in- and around our entrances seriously. For that reason, we always aim at exceeding your expectations when it comes to personal safety and strive for your peace of mind.

The Besam SL500 and Besam SL500 T offer a number of highly intelligent features as standard, specially designed for **optimal pedestrian safety at all times**. The operator's modular features also open up for adding safety features, which is ideal if you were not able to impact the building's entrance solution from start or have had a change of heart.

Support and advice

We have the passion, experience and expertise to support you in project managing your entrances; from the drawing table to budget management and service maintenance programs for your complete building.

For your convenience, energy-savings and pro-longing the product's life cycle, regular maintenance is recommended. With ASSA ABLOY Entrance Systems Maintenance Programs and service friendly design features that support our professional service technicians, maintenance has never been more efficient.
